

# DIGITAL PANELS IN VISCOSE, COTTON AND LINEN

## LAYING INSTRUCTIONS

## DIGITAL PANELS IN VISCOSE, COTTON AND LINEN

Digital panels are extremely versatile products, suitable for covering ambiances offering a broader and more flexible concept of decorative solutions.

The textures and spinning of these supports qualitatively enhance the printed subject.

Viscose has a smoother and silkier tactile effect, while linen and cotton have a more natural and rougher finish.

The types of support on which they are proposed require **maximum attention** and **extreme care** during the installation. Given the delicacy in the cleaning phase, avoid rubbing and the use of water and detergent products.

## LAYING INSTRUCTIONS

The components necessary for installation are:

**Glue:** recommended type of glue for non-woven product.

**Product:** technical fabric with graphic print

The installation temperature must be between + 7 °C and + 35 °C.

For an optimal result, fully respect the application sequence and the recommended quantities.

**IMPORTANT:** any defects must be found after the application of the first two sheets and no later than. Complaints for larger quantities are not accepted. No other costs are accepted.

**N.B.: we recommend that you rely on a professional for the installation of this product.**

1

Prepare the surfaces, which must be smooth, dry and slightly absorbent.

2

Use a glue suitable for non-woven product by applying it both on the surface to be decorated and on the back of the first sheet.

3

Lay the wallpaper sheet on the wall, applying pressure appropriately.  
Make sure that no air bubbles form and that the panel adheres perfectly to the wall.

4

Trim the ends.

5

Lay the next sheet in relation to the image of the previous sheet following the same procedures indicated in point 3.

6

Remove the glue **very carefully** using a soft fiber cloth, trying not to spread it on the panel and avoiding rubbing.

## KEY LEGEND

Very good light resistance

Adhesive to be applied to the support to be decorated

Adhesive to be applied to the wallcovering
